DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4 are allowed.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claim 7 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6,812,962. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 7 of the instant application is broader than the claims 1-9 of Pat. No. '962. In this case, it is noted that both claim 7 of the instant application and claims 1-9 of Pat. No. '962 called for a method for transferring digital images using a camera (i.e., see claim 6) having a digital memory (i.e., noted the memory recited in claims 1 and 6), communication means (i.e., noted the communication device as covered by claim 1) for transmitting the captured digital images (i.e.,

Art Unit: 2685

noted the transmitting steps as recited in claim 6), a display device (i.e., noted the display device used in claims 1 and 6) and transferring the digital image (i.e., noted the receiving instruction for placement of an order as recited in claim 6 and forwarding the digital image as recited claim 1), and receiving from the service provider confirmation of the receipt of the order including a reduced resolution file (i.e., thumbnail images); and displaying the confirmation on the display device. In view of this, it is cleared that the subject matters recited in claim 7 of the instant application were fully disclosed in and covered by the claims 1-9 of Pat. No. '962, thus, allowing claim 7 of the instant application would result in an unjustified or improper timewise extension of the "right to exclude" granted by a patent.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
